

What About Law

What About Law?

“‘What About Law?’ succeeds where so many legal guidebooks fail ... [it] skilfully demystifies the law and ably proves its argument. The law is, indeed, all around us - and this book will whet your appetite to find out how and why.” – Alex Wade, *The Times* (of the previous edition) Law is one of the few subjects that the school leaver, choosing a degree course, will have very little real understanding of. This book comes to the rescue by clearly setting out what a prospective law student can expect and why a student should choose to study law. This new edition is updated to reflect the reality of studying law today, highlighting changes due to Brexit and reforms to constitutional law. The book covers the compulsory subjects every law student has to study: contract, criminal, property and trusts law, and brings them up to date. With a clear core structure and approach it takes a case from each of these subjects to illustrate legal issues and methodology. The writing style is accessible and has the audience – novices to law – firmly in mind. What About Law? shows how the study of law can be fun, intellectually stimulating and challenging. It introduces prospective students to the legal system, legal reasoning, critical thinking and argument. Written by a team of experienced teachers, this book should be read by every student about to embark on the study of law.

The Law Says What?

This advanced introduction to central questions in legal philosophy attempts to breathe new life into stalled research.

What Makes Law

'David Howarth's *Law as Engineering* is a profound contribution to the law. Evoking the level of originality associated with pioneering contributions to law and economics half a century ago, Howarth's book aligns law, not on economics, but on engineering styles of thought and problem solving. His analysis sheds deep light on a 21st century world where the work of transactional and legislative lawyers, who design and build social structures and devices much as engineers do physical ones, is becoming ever more important and complex, with far-reaching implications for both legal ethics and legal education.' – Scott Boorman, Yale university, US 'This is a brilliant, highly original analysis of what lawyers actually do and what they ought to

do in order to protect their clients and the public. It will rescue lawyers from the kinds of behaviour that contributed to the financial crash. It also points legal education and research in important new directions.' – Sir Bob Hepple, Professor, QC FBA 'This book brings an important new perspective to a consideration of what lawyers do, and of what they are for. The implications explored in the book are an immensely valuable contribution to thinking on the future development of legal education and training. It should be read by everyone responsible for recruiting or training others for the law, whether in the public or the private sector.' – Sir Stephen Laws KCB, QC(Hon), LLD(Hon), First Parliamentary Counsel Law as Engineering proposes a radically new way of thinking about law, as a profession and discipline concerned with design rather than with litigation, and having much in common with engineering in the way it produces devices useful for its clients. It uses that comparison to propose ways of improving legal design, to advocate a transformation of legal ethics so that the profession learns from its role in the crash of 2008, and to reform legal education and research. Offering a totally new perspective, this book will be a fascinating read for law students and prospective law students, legal academics across all sub-fields, lawyers in government, especially those engaged in drafting legislation, and policymakers.

Law As Engineering

This brief book is designed to prepare students for their first year of law school, thereby decreasing their anxiety and increasing their chances of achieving academic success. Also appropriate for non-J.D. students, including LLM students from foreign countries and graduate students outside law school. Features: Gives student basic grounding in discrete non-legal topics that are important to the contemporary study of law Includes and “Test Your Understanding” boxes to allow students to use what they are learning Friendly writing style Images and graphics help students remember material

What Every Law Student Really Needs to Know

Top US legal scholars and political scientists examine how the law shapes judges' behavior and decisions, and what it means for society at large. Although there is a growing consensus among legal scholars and political scientists, significant points of divergence remain. Contributors to *What's Law Got to Do with It?* explore ways to reach greater accord on the complexity and nuance of judicial decision making and judicial elections, while acknowledging that agreement on what judges do is not likely to occur any time soon. As the first forum in which political scientists and legal scholars engage with one another on these hot button issues, this volume strives to establish a true interdisciplinary conversation. The inclusion of reactions from practicing judges puts into high relief the deep-seated and opposing beliefs about the roles of law and politics in judicial work. Praise for *What's Law Got to Do with It?* “Geyh (associate dean for research and John F. Kimberling professor of law, Indiana Univ. School of Law) is well qualified to edit this reader about the interaction of law and politics in contemporary society. The contributors . . . are among the very best scholars in the legal and political science realm The writing is lively and easy to follow for the somewhat sophisticated reader Highly recommended.” —Choice “Readers will find these essays fascinating, thoughtful and sometimes infuriating, as conventional disciplinary wisdom is defended, modified and refuted. The result is a terrific text for all students of the legal process.” —Mark A. Graber, University of Maryland “This volume pulls together an excellent cast to examine one of the most intriguing and most difficult questions in the study of law and politics today—what role does law play in the job of judging? There is a lot to learn in these pages, and this book does a fine job of pushing the conversation forward.” —Keith Whittington, Princeton University

What's Law Got to Do With It?

“*When Law Goes Pop*” is an examination of legal practice in today's world, one that should be needed by everyone concerned with the future of our legal system and the meaning we invest in it.

When Law Goes Pop

In this remarkable collaboration, one of the nation's leading civil rights lawyers joins forces with one of the world's foremost cultural psychologists to put American constitutional law into an American cultural context. By close readings of key Supreme Court opinions, they show how storytelling tactics and deeply rooted mythic structures shape the Court's decisions about race, family law, and the death penalty. *Minding the Law* explores crucial psychological processes involved in the work of lawyers and judges: deciding whether particular cases fit within a legal rule ("categorizing"), telling stories to justify one's claims or undercut those of an adversary ("narrative"), and tailoring one's language to be persuasive without appearing partisan ("rhetorics"). Because these processes are not unique to the law, courts' decisions cannot rest solely upon legal logic but must also depend vitally upon the underlying culture's storehouse of familiar tales of heroes and villains. But a culture's stock of stories is not changeless. Amsterdam and Bruner argue that culture itself is a dialectic constantly in progress, a conflict between the established canon and newly imagined "possible worlds." They illustrate the swings of this dialectic by a masterly analysis of the Supreme Court's race-discrimination decisions during the past century. A passionate plea for heightened consciousness about the way law is practiced and made, *Minding the Law* will be welcomed by a new generation concerned with renewing law's commitment to a humane justice.

Table of Contents: 1. Invitation to a Journey 2. On Categories 3. Categorizing at the Supreme Court *Missouri v. Jenkins* and *Michael H. v. Gerald D.* 4. On Narrative 5. Narratives at Court *Prigg v. Pennsylvania* and *Freeman v. Pitts* 6. On Rhetorics 7. The Rhetorics of Death *McCleskey v. Kemp* 8. On the Dialectic of Culture 9. Race, the Court, and America's Dialectic From *Plessy* through *Brown* to *Pitts* and *Jenkins* 10. Reflections on a Voyage Appendix: Analysis of Nouns and Verbs in the *Prigg*, *Pitts*, and *Brown* Opinions Notes Table of Cases Index

Reviews of this book: Amsterdam, a distinguished Supreme Court litigator, wanted to do more than share the fruits of his practical experience. He also wanted to...get students to think about thinking like a lawyer...To decode what he calls "law-think," he enlisted the aid of the venerable cognitive psychologist Jerome Bruner...[and] the collaboration has resulted in [this] unusual book. --James Ryerson, *Lingua Franca*

Reviews of this book: It is hard to imagine a better time for the publication of *Minding the Law*, a brilliant dissection of the court's work by two eminent scholars, law professor Anthony G. Amsterdam and cultural anthropologist Jerome Bruner...Issue by issue, case by case, Amsterdam and Bruner make mincemeat of the court's handling of the most important constitutional issue of the modern era: how to eradicate the American legacy of race discrimination, especially against blacks. --Edward Lazarus, *Los Angeles Times Book Review*

Reviews of this book: This book is a gem...[Its thesis] is easily stated but remarkably unrecognized among a shockingly large number of lawyers and law professors: law is a storytelling enterprise thoroughly entrenched in culture....Whereas critical legal theorists have talked among themselves for the past two decades, Amsterdam and Bruner seek to engage all of us in a dialogue. For that, they should be applauded. --Daniel R. Williams, *New York Law Journal*

Reviews of this book: In *Minding the Law*, Anthony Amsterdam and Jerome Bruner show us how the Supreme Court creates the magic of inevitability. They are angry at what they see. Their book is premised on the conviction that many of the choices made in Supreme Court opinions 'lack any justification in the text'...Their method is to analyze the text of opinions and to show how the conclusions reached do not always follow from the logic of the argument. They also show how the Court casts its rhetoric like a spell, mesmerizing its audience, and making the highly contingent shine with the light of inevitability. --Mitchell Goodman, *News and Observer* (Raleigh, North Carolina)

Reviews of this book: What do controversial Supreme Court decisions and classic age-old tales of adultery, villainy, and combat have in common? Everything--at least in the eyes of [Amsterdam and Bruner]. In this substantial study, which is equal parts dense and entertaining, the authors use theoretical discussions of literary technique and myths to expose what they see as the secret intentions of Supreme Court opinions...Studying how lawyers and judges employ the various literary devices at their disposal and noting the similarities between legal thinking and classic tactics of storytelling and persuasion, they believe, can have 'astonishing consciousness-retrieving effects'...The agile minds of Amsterdam and Bruner, clearly storehouses of knowledge on a range of subjects, allow an approach that might sound far-fetched occasionally but pays dividends in the form of gained perspective--and amusement. --Elisabeth Lasch-Quinn, *Washington Times*

Reviews of this book: Stories and the way judges-intentionally or not-categorize and spin them, are as responsible for legal rulings as logic and precedent, Mr. Amsterdam and Mr. Bruner said. Their novel attempt to reach into the psyche of...members of

the Supreme Court is part of a growing interest in a long-neglected and cryptic subject: the psychology of judicial decision-making. --Patricia Cohen, New York Times Most law professors teach by the 'case method,' or say they do. In this fascinating book, Anthony Amsterdam--a lawyer--and Jerome Bruner--a psychologist--expose how limited most case 'analysis' really is, as they show how much can be learned through the close reading of the phrases, sentences, and paragraphs that constitute an opinion (or other pieces of legal writing). Reading this book will undoubtedly make one a better lawyer, and teacher of lawyers. But the book's value and interest goes far beyond the legal profession, as it analyzes the way that rhetoric--in law, politics, and beyond--creates pictures and convictions in the minds of readers and listeners. --Sanford Levinson, author of Constitutional Faith Tony Amsterdam, the leader in the legal campaign against the death penalty, and Jerome Bruner, who has struggled for equal justice in education for forty years, have written a guide to demystifying legal reasoning. With clarity, wit, and immense learning, they reveal the semantic tricks lawyers and judges sometimes use--consciously and unconsciously--to justify the results they want to reach. --Jack Greenberg, Professor of Law, Columbia Law School

Minding the Law

What is law? This question has preoccupied philosophers from Plato to Thomas Hobbes to H. L. A. Hart. Yet many others find it perplexing. How could we possibly know how to answer such an abstract question? And what would be the point of doing so? In *Legality*, Scott Shapiro argues that the question is not only meaningful but vitally important. In fact, many of the most pressing puzzles that lawyers confront—including who has legal authority over us and how we should interpret constitutions, statutes, and cases—will remain elusive until this grand philosophical question is resolved. Shapiro draws on recent work in the philosophy of action to develop an original and compelling answer to this age-old question. Breaking with a long tradition in jurisprudence, he argues that the law cannot be understood simply in terms of rules. Legal systems are best understood as highly complex and sophisticated tools for creating and applying plans. Shifting the focus of jurisprudence in this way—from rules to plans—not only resolves many of the most vexing puzzles about the nature of law but has profound implications for legal practice as well. Written in clear, jargon-free language, and presupposing no legal or philosophical background, *Legality* is both a groundbreaking new theory of law and an excellent introduction to and defense of classical jurisprudence.

Legality

In a few thousand words the Constitution sets up the government of the United States and proclaims the basic human and political rights of its people. From the interpretation and elaboration of those words in over 500 volumes of Supreme Court cases comes the constitutional law that structures our government and defines our individual relationship to that government. This book fills the need for an account of that law free from legal jargon and clear enough to inform the educated layperson, yet which does not condescend or slight critical nuance, so that its judgments and analyses will engage students, practitioners, judges, and scholars. Taking the reader up to and through such controversial recent Supreme Court decisions as the Texas sodomy case and the University of Michigan affirmative action case, Charles Fried sets out to make sense of the main topics of constitutional law: the nature of doctrine, federalism, separation of powers, freedom of expression, religion, liberty, and equality. Fried draws on his knowledge as a teacher and scholar, and on his unique experience as a practitioner before the Supreme Court, a former Associate Justice of the Supreme Judicial Court of Massachusetts, and Solicitor General of the United States to offer an evenhanded account not only of the substance of constitutional law, but of its texture and underlying themes. His book firmly draws the reader into the heart of today's constitutional battles. He understands what moves today's Court and that understanding illuminates his analyses.

Saying what the Law is

Now in its Second Edition "Growth is Dead" addresses the future of "BigLaw" (or "SophisticatedLaw") in the wake of the great financial reset of 2008 and its continuing repercussions including: (a) relentless

pricing pressures; (b) excess capacity; (c) partner expectations; and (d) the accelerating entry of new "legal service provider" organizations, with all their implications for career paths, the traditional leveraged staffing model of law firms, and much more. Brad Karp, Chair of the Firm at Paul Weiss, describes it thus: "I read all 12 installments of your series with great interest...twice. This is an extraordinary body of work that reflects enormous insight and ought be required reading by managing partners of law firms and professional services organizations. You do a very effective job of challenging the status quo and your series is a much-needed wake up call for our profession. As always, I plan to share many of your insights with my partners. And I plan to cogitate over many of your proposed initiatives." "2012 Year in Review: Must-Read." "Any review of 2012 must begin with Bruce MacEwen's 12-part "Growth is Dead" series, which looks at, and analyzes, the monumental effects of the Great Recession on the legal industry." "Immediately became required reading for law firm leaders, by the one and only Bruce MacEwen." - Bloomberg Law "When it comes to the economics of the legal industry, there's Bruce MacEwen and then there's everyone else."

Growth is Dead

New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' "Amazing Books" of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This "powerful and disturbing history" exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

The Color of Law

Much of today's political rhetoric decries the welfare state and our maze of government regulations. Critics hark back to a time before the state intervened so directly in citizens' lives. In *The People's Welfare*, William Novak refutes this vision

The People's Welfare

"In this new, 6th edition of a law career classic, lawyers are introduced to a unique five-part model for career satisfaction. It is based on a well-established principle that the better the fit between your career identity and your job, the greater your long-term satisfaction"--Page 4 of cover.

The New what Can You Do with a Law Degree?

Recent high-profile corporate scandals—such as those involving Enron in the United States, Yukos in Russia, and Livedoor in Japan—demonstrate challenges to legal regulation of business practices in capitalist economies. Setting forth a new analytic framework for understanding these problems, *Law and Capitalism* examines such contemporary corporate governance crises in six countries, to shed light on the interaction of legal systems and economic change. This provocative book debunks the simplistic view of law's instrumental

function for financial market development and economic growth. Using comparative case studies that address the United States, China, Germany, Japan, Korea, and Russia, Curtis J. Milhaupt and Katharina Pistor argue that a disparate blend of legal and nonlegal mechanisms have supported economic growth around the world. Their groundbreaking findings show that law and markets evolve together in a “rolling relationship,” and legal systems, including those of the most successful economies, therefore differ significantly in their organizational characteristics. Innovative and insightful, *Law and Capitalism* will change the way lawyers, economists, policy makers, and business leaders think about legal regulation in an increasingly global market for capital and corporate governance.

Law & Capitalism

The struggle for Palestinian sovereignty has been a quest for inclusion in--and recognition from--a world order that left them behind. Sovereignty has become a trap for Palestinians and getting out is a matter of political vision and will. The law does not determine any particular outcome, it only promises the contest over one. While Jewish and Palestinian sovereignty are incommensurable, their belonging is not. The law is not just and justice is not rule-based.

Justice for Some

Fifteen law schools have been sued for allegedly reporting misleading employment data. For years, almost all law schools claimed to have a 90% or better overall employment rate. Since 2012, we now know that at many ABA-accredited schools less than 50% of their graduates find long-term, full-time jobs that require passage of the bar exam--the actual attorney jobs. Many schools also have relatively low bar-exam passage rates and high attrition rates (i.e., high percentages of students who flunk out or drop out). Professor Johnson demonstrates how to find relevant data about a law school and how to analyze over twenty different criteria in assessing whether the school has sufficiently satisfactory outcomes and is, therefore, worth attending. Such a thorough analysis will help prospective students avoid getting “vanity degrees”--the diplomas that look lovely in a picture frame but that may not make one employable as an attorney.

Is a Law Degree Still Worth the Price?

52 short, understandable Conversations provide artists in all genres with a working knowledge of the legal issues affecting their arts and businesses. Copyright. Trademark. Contracts. Lawyers. Courts. Nonprofits.

Arts Law Conversations

“The goal of this practical guide to food law is to offer attorneys of all stripes an introduction to how different areas of law and legal practice intersect with food”--

Food Law

The authors look at the connection between democracy and efficiency as they investigate the meaning of law and order. The authors argue that only through a democratically accountable police service can we hope to build up relationships within the inner city.

What Is to Be Done About Law and Order?

Provides a concise road map of the latest collective wisdom on leadership and applies those principles to women lawyers. Synthesizes and distills the research and key concepts on leadership techniques and success that help working women in any field develop in their careers, (b) tailors these principles for women practicing law, and (c) puts the learning into practice through interviews with 11 women legal leaders and

through total leadership makeovers.

What is Law?

Buy a new version of this Connected Casebook and receive access to the online e-book, practice questions from your favorite study aids, and an outline tool on CasebookConnect, the all in one learning solution for law school students. CasebookConnect offers you what you need most to be successful in your law school classes - portability, meaningful feedback, and greater efficiency. Concise new title by the top author in legal research. Focuses on pre- and post-search analysis for effectively filtering vast amounts of material. Teaches students how to identify the most pertinent and authoritative information to solve a legal problem. Features: Concise, reasonably priced new title from the top legal research author. Approaches legal research as a filtering process to identify the most pertinent and authoritative information from vast search results. Part I: Explains how to define a research question; pre-filter content before beginning a search; conduct research; and establish post-search criteria for filtering results. Part II: Describes essential features of individual sources of authority and search strategies unique to each source. Part III: Contains research flowcharts to help students plan research strategy for different types of research projects. Contains all information students need to learn fundamental principles of legal research. Can also be used to complement other texts and classroom materials. Not simply a shorter version of Basic Legal Research. Looks at research as a process of filtering the available information, rather than as a process that requires first choosing the right source of authority to solve a legal problem. CasebookConnect features: ONLINE E-BOOK Law school comes with a lot of reading, so access your enhanced e-book anytime, anywhere to keep up with your coursework. Highlight, take notes in the margins, and search the full text to quickly find coverage of legal topics. PRACTICE QUESTIONS Quiz yourself before class and prep for your exam in the Study Center. Practice questions from Examples & Explanations, Emanuel Law Outlines, Emanuel Law in a Flash flashcards, and other best-selling study aid series help you study for exams while tracking your strengths and weaknesses to help optimize your study time. OUTLINE TOOL Most professors will tell you that starting your outline early is key to being successful in your law school classes. The Outline Tool automatically populates your notes and highlights from the e-book into an editable format to accelerate your outline creation and increase study time later in the semester.

Learning to Lead

Most young people considering studying law, or pursuing a legal career, have very little idea of what learning law involves and how universities teach law to their students. The new edition of this book, which proved very popular when first published in 2007, provides a 'taster' for the study of law; a short, accessible presentation of law as an academic subject, designed to help 17- and 18-year old students and others decide whether law is the right choice for them as a university subject, or, if they have already made the choice, what to expect when they start their law degree. It helps answer the question 'what should I study at university?' and counters the perception that law is a dry, dull subject. What About Law? shows how the study of law can be fun, intellectually stimulating, challenging and of direct relevance to students. Using a case study approach, the book introduces prospective law students to the legal system, as well as to legal reasoning, critical thinking and argument. This is a book that should be in the library of every school with a sixth form, every college and every university, and it is one that any student about to embark on the study of law should read before they commence their legal studies. All of the authors have long experience in teaching law at Cambridge and elsewhere and all have also been involved, at various times, in advising prospective law students at open days and admissions conferences. Listed as one of the 'Six of the best law books' that a future law student should read by the Guardian Law Online, 8th August 2012.

Researching the Law

Learning the Law is unique among law books. It does not say what the law is; rather, it aims to be a Guide, Philosopher and Friend to the reader at every stage of his legal studies.

What About Law?

"Business Law I Essentials is a brief introductory textbook designed to meet the scope and sequence requirements of courses on Business Law or the Legal Environment of Business. The concepts are presented in a streamlined manner, and cover the key concepts necessary to establish a strong foundation in the subject. The textbook follows a traditional approach to the study of business law. Each chapter contains learning objectives, explanatory narrative and concepts, references for further reading, and end-of-chapter questions."--website.

Learning the Law

Conversations About Law includes the following 5 carefully-edited Ideas Roadshow Conversations featuring leading researchers. This collection includes a detailed preface highlighting the connections between the different books. Each book is broken into chapters with a detailed introduction and questions for discussion at the end of each chapter: 1. Neurolaw - A Conversation with Nita Farahany, Robert O. Everett Distinguished Professor of Law and Professor of Philosophy at Duke University. Nita Farahany is a leading scholar on the ethical, legal, and social implications of emerging technologies. This wide-ranging conversation examines the growing impact of modern neuroscience on the law, deepening our understanding of a wide range of issues, from legal responsibility to the American Constitution's Fifth Amendment privilege against self-incrimination. 2. Improving Human Rights - A Conversation with Emilie Hafner-Burton, the John D. and Catherine T. MacArthur Professor of International Justice and Human Rights at UC San Diego. This extensive conversation covers a wide range of topics, including international law, when and why international laws work and don't work, the international human rights system and concrete measures that could be taken to improve it, the International Criminal Court, and the role of states in the protection of human rights. 3. The Malleability of Memory - A Conversation with Elizabeth Loftus, a world-renowned expert on human memory and Distinguished Professor of Psychological Science; Criminology, Law, and Society; Cognitive Science and Law at UC Irvine. This in-depth conversation covers her ground-breaking work on the misinformation effect, false memories and her battles with "repressed memory" advocates, the introduction of expert memory testimony into legal proceedings and the effect of DNA evidence on convincing judges of the problematic nature of eyewitness testimony. 4. Criminal Justice: An Examination - A Conversation with Julian Roberts, Professor of Criminology at the University of Oxford. Julian Roberts is an international expert on sentencing throughout the common-law world and is strongly involved in connecting scholars with practitioners as well as promoting greater public understanding of sentencing. This thought-provoking conversation covers a wide range of topics related to criminal justice, including plea bargaining, the involvement of victims in criminal sentencing procedures, victim impact statements, parole, sentencing multiple and repeat crimes, community-based sentencing, alternate dispute resolution, rehabilitation, and more. 5. Mental Health: Policies, Laws and Attitudes - A Conversation with Elyn Saks, Orrin B. Evans Distinguished Professor of Law, and Professor of Law, Psychology and Psychiatry and the Behavioral Sciences at USC. During this wide-ranging conversation Elyn Saks candidly shares her personal experiences with schizophrenia and discusses the intersection of law, mental health and ethics: the legal and ethical implications surrounding mental health. Further topics include psychotropic medication and the law, criminalization and mental illness, and an exploration of which countries are more progressive with respect to important mental health policies, laws and procedures, and more. Howard Burton is the founder and host of all Ideas Roadshow Conversations and was the Founding Executive Director of Perimeter Institute for Theoretical Physics. He holds a PhD in theoretical physics and an MA in philosophy.

The Concept of Law

In recent years, there have been a number of concerns about the recognition of religious laws and the existence of religious courts and tribunals. There has also been the growing literature on legal pluralism which seeks to understand how more than one legal system can and should exist within one social space. However, whilst a number of important theoretical works concerning legal pluralism in the context of

cultural rights have been published, little has been published specifically on religion. Religion and Legal Pluralism explores the extent to which religious laws are already recognised by the state and the extent to which religious legal systems, such as Sharia law, should be accommodated.

Business Law I

Law helps students \"test drive\" a career in law while they are still in school. Job profiles include: Court reporters Elder law attorneys Intellectual property lawyers Judges Lawyers Legal nurse consultants Legal secretaries Paralegals Prosecutors Public defenders.

Working with Contracts

This book is based on presentations and discussions at the special workshop “The concept of Legal Consciousness” held on July 7, 2022, in Bucharest, Romania, as part of thirtieth biennial World Congress of the International Association for the Philosophy of Law and Social Philosophy (IVR). The workshop was focused on the importance of this concept for legal theory, legal sociology, and legal psychology (“psychology and law”). The book consists of fourteen contributions divided into four thematic parts elaborating the following topics: concept of law, methodology of legal sciences, role of legal consciousness in legal theory and legal sociology, adjudication, constitutionalization, modification of the legal system, and the deliberate normative change.

Business Law and the Legal Environment

This book offers an advanced introduction to central questions in legal philosophy. What factors determine the content of the law in force? What makes a normative system a legal system? How does law beyond the state differ from domestic law? What kind of moral force does law have? The most important existing views are introduced, but the aim is not to survey the existing literature. Rather, this book introduces the subject by stepping back from the fray to sketch the big picture, to show just what is at stake in these old debates. Legal philosophy has become somewhat arid and inward looking. In part this is because the disagreement between the main camps on the important questions is apparently intractable. The main aim of the book is to suggest both a diagnosis and a proper practical response to this situation of intractable disagreement about questions that do matter.

Conversations About Law

Matthias Klatt is Professor for Public Law, EU Law, Public International Law, and Jurisprudence at the University of Hamburg. --Book Jacket.

What about a Career in Labor Law?

Understood one way, the branch of contemporary philosophical ethics that goes by the label \"metaethics\" concerns certain second-order questions about ethics-questions not in ethics, but rather ones about our thought and talk about ethics, and how the ethical facts (insofar as there are any) fit into reality. Analogously, the branch of contemporary philosophy of law that is often called \"general jurisprudence\" deals with certain second order questions about law- questions not in the law, but rather ones about our thought and talk about the law, and how legal facts (insofar as there are any) fit into reality. Put more roughly (and using an alternative spatial metaphor), metaethics concerns a range of foundational questions about ethics, whereas general jurisprudence concerns analogous questions about law. As these characterizations suggest, the two sub-disciplines have much in common, and could be thought to run parallel to each other. Yet, the connections between the two are currently mostly ignored by philosophers, or at least under-scrutinized. The new essays collected in this book are aimed at changing this state of affairs. Dimensions of Normativity

collects together works by metaethicists and legal philosophers that address a number of issues that are of common interest, with the goal of accomplishing a new rapprochement between the two sub-disciplines.
