## Where Do Babies Come From?

An engaging introduction for very young children to the basic facts of life in a way that is gentle, age-appropriate and accessible. Research shows that children are learning about sex at an increasingly young age and often from undesirable sources. The Q&A format, with questions posed in the child's voice and answers starting simply and becoming gradually more in-depth, allows the adult to guide the conversation to a natural and satisfying conclusion. Additional questions at the back of the book allow for further discussion. Child psychologist Dr. Jillian Roberts designed the Just Enough series to empower parents/caregivers to start conversations with young ones about difficult or challenging subject matter. Other books in the series deal with diversity, death, separation and divorce.

## Where Do Babies Come From?

Why cracking the code of human conception took centuries of wild theories, misogynist blunders, and ludicrous mistakes Throughout most of human history, babies were surprises. People knew the basics: men and women had sex, and sometimes babies followed. But beyond that the origins of life were a colossal mystery. The Seeds of Life is the remarkable and rollicking story of how a series of blundering geniuses and brilliant amateurs struggled for two centuries to discover where, exactly, babies come from. Taking a page from investigative thrillers, acclaimed science writer Edward Dolnick looks to these early scientists as if they were detectives hot on the trail of a bedeviling and urgent mystery. These strange searchers included an Italian surgeon using shark teeth to prove that female reproductive organs were not 'failed' male genitalia, and a Catholic priest who designed ingenious miniature pants to prove that frogs required semen to fertilize their eggs. A witty and rousing history of science, The Seeds of Life presents our greatest scientists struggling-against their perceptions, their religious beliefs, and their deep-seated prejudices-to uncover how and where we come from.

## **Confidence is My Superpower**

When a new baby arrives among the Beng people of West Africa, they see it not as being born, but as being reincarnated after a rich life in a previous world. Far from being a tabula rasa, a Beng infant is thought to begin its life filled with spiritual knowledge. How do these beliefs affect the way the Beng rear their children? In this unique and engaging ethnography of babies, Alma Gottlieb explores how religious ideology affects every aspect of Beng childrearing practices—from bathing infants to protecting them from disease to teaching them how to crawl and walk—and how widespread poverty limits these practices. A mother of two, Gottlieb includes moving discussions of how her experiences among the Beng changed the way she saw her own parenting. Throughout the book she also draws telling comparisons between Beng and Euro-American parenting, bringing home just how deeply culture matters to the way we all rear our children. All parents and anyone interested in the place of culture in the lives of infants, and vice versa, will enjoy *The Afterlife Is Where We Come From*. "This wonderfully reflective text should provide the impetus for formulating research possibilities about infancy and toddlerhood for this century." — Caren J. Frost, *Medical Anthropology Quarterly* "Alma Gottlieb's careful and thought-provoking account of infancy sheds spectacular light upon a much neglected topic. . . . [It] makes a strong case for the central place of babies in anthropological accounts of religion. Gottlieb's remarkably rich account, delivered after a long and reflective period of gestation, deserves a wide audience across a range of disciplines."—Anthony Simpson, *Critique of Anthropology*

## **Where Do Babies Come From?**

One evening, my daughter and I were in the kitchen with my great-grandson. Out of the blue, he asked my daughter, "Where do babies come from?" My daughter told him babies come from God, to which I added a few more comments. Shortly after I was inspired by God to write this book. It is my prayer that this biblical truth learned at an early age will be a principle practiced in later life.

The intellectual movements of psychoanalysis, postmodernism, and feminism have redefined the ways in which we think about human experience. And yet, an integration of these movements has been elusive, if not impossible. In this landmark book, J.C. Smith and Carla J. Ferstman combine these disparate traditions to create a provocative, unified, and tightly woven perspective that transcends the misogyny implicit in much of Freudian psychoanalytic theory. The dialectics of domination and submission are central to Smith and Ferstman's argument. Men and women, they insist, must avoid the temptation to fetishize equality and recognize the roles of domination and submission in the human psyche, or, in Nietzsche's terms, the Will to Power. They argue that the unification of psychoanalysis, postmodernism, and feminism leads us to a shocking conclusion--that women and men cannot move beyond the suffering which so haunts the human condition, unless heterosexual men surrender the power that is causing their misery and affirm life by joyfully accepting domination by women. And women, conversely, must reaffirm their power by rejecting Oedipal genderization and embracing a liberating matriarchal consciousness and a matriphallic sexuality. A work of tremendous insight and extraordinary intellectual energy, *The Castration of Oedipus* will provoke strong reactions in all readers regardless of ideology.
