Stripped: Depeche Mode

An electrifying new biography about the four Essex lads who became award-winning stadium superstars and champions of synth pop! Jonathan Miller's groundbreaking book features in-depth interviews with founder member Vince Clarke and producers Gareth Jones and Mark Bell, and contains never-before seen interviews with the band members themselves. With additional input from Gary Human, Howard Jones and Thomas Dolby this is a unique portrait of a band that almost lost control when their lives went off the rails and lead singer Dave Gahan's heroin addiction nearly killed him. In the end Depeche Mode not only survived, they triumphed, racking up a staggering 40 million-plus album sales on the way. This is their amazing story, told in full for the first time. Born out of the post-punk backlash in the early 80's, Depeche Mode took their name from a phrase in a French style magazine and became the definitive international synth-pop group. Vince Clarke, Andy Fletcher and Martin Gore had started out as an Essex guitar band but it was their bright and upbeat synthesizer-driven brand of pop fronted by Dave Gahan that was to find global acceptance and enjoy unlikely success in the US. Despite a handful of early plaudits in the music press, the group won only intermittent critical acceptance over the years, its often light musical approach contrasting with lyrics that sometimes plunge into darker topics like S&M, religious fetishism and the scourge of capitalism. But whatever the music press said, the fans finally bought into Depeche Mode in a big way. Their *Violator* tour at the start of the 90s sold millions of records and turned them into major US concert stars. In true rock style, Depeche Mode's members have suffered their share of internal strife over a long career. Dave Gahan reinvented himself as a lead singer with both a harder musical edge and a near-fatal drug habit, while internal acrimony often marred the later stages of their career. Jonathan Miller has made an exemplary job of telling the Depeche Mode saga in its entirety and goes a long way towards explaining how the group have managed to thrive when almost all their post-punk contemporaries fell by the wayside long ago.

Discover the complex work and personal experiences of women in the exotic dancing industry What kind of woman dances naked for money? Bernadette Barton takes us inside countless strip bars and clubs, from upscale to back road as well as those that specialize in lapdancing, table dancing, topless only, or peep shows, to reveal the startling lives of exotic dancers. Based on over five years of research and from visiting clubs around the country, particularly in San Francisco, Hawaii, and Kentucky, *Stripped* offers a rare portrait of not just how dancers get into the business but what it's like for those who choose to strip year after year. Through captivating interviews and first-hand observation, Barton recounts why these women began stripping, the initial excitement and financial rewards from the work, the dangers of the life—namely, drugs and prostitution—and, inevitably, the difficulties in staying in the business over time, especially for their sexuality and self-esteem. *Stripped* provides fresh insight into the complex work and personal experiences of exotic dancers, one that goes beyond the "sex wars" debate to offer an important new understanding of sex work.

Fundamentals of Criminal Law

Written by a noted expert in criminal law, this book explores the philosophical underpinnings of the law's major doctrines concerning actus reus, mens rea, and defences, showing that they are not always driven by culpability. They are grounded also in principles of moral responsibility, ascriptive responsibility, and wrongdoing. As such, they engage wider debates about wrongdoing, and about the boundaries between liability and freedom. This multi-textured analysis allows this book to take more nuanced positions about many important controversies in criminal law. It argues, for example, that liability for omissions and for negligence—and even some strict liability elements—can sometimes be legitimate yet, at the same time, should be relatively rare. It also explains why principles of causation can differ in the criminal law from other contexts; what is wrong with the 'voluntary act' requirement; and why luck can affect the wrongs we commit without changing our degree of blameworthiness for committing them. The book concludes with an account of the major types of defences, and of how they interact with an agent's wrong and her underlying motivations. This volume presents a coherent and rich vision of the criminal law that, by its sheer breadth, makes a distinctive contribution to the literature, of interest to lawyers and philosophers alike.

The Bride Stripped Bare

Cancer—that unfair, indiscriminate, devastating disease—affects everyone at some point, whether a family member, a friend, or ourselves. It is a life-altering event of seismic proportions that forever impacts the landscape of our lives and, with raw force, pushes us to reorder priorities, reassess values, and perhaps

rethink our faith. A diagnosed tumor forced Heather King to this crisis of mortality, to live at the crossroads of uncertainty, belief, fear, culture, and modern medicine. Only her faith in Christ, the Great Physician, helped her sort through the crippling uncertainty and choose her best way forward. *Stripped* is a heartfelt expression of profound Catholic faith in the face of a cancer diagnosis. It chronicles King's informed decision not to blindly declare "war on her cancer" but to carefully examine all the medical evidence available and to choose to bring God into her decision making, even if that meant going against established medical advice. The story of *Stripped* demonstrates how King's medical and spiritual journey led her to a place of freedom in Christ, where she could make an informed and faith-filled decision about her course of treatment and ultimately, accept her vulnerability. King learned, as we all must, that healing means so much more than simply "getting well."

Stripped examines the ways in which erotic bodies communicate in performance and as cultural figures. Focusing on symbols independent of language, Maggie M. Werner explores the signs and signals of erotic dance, audience responses to these codes, and how this exchange creates embodied rhetoric. Informed by her own ethnographic research conducted in strip clubs and theaters, Werner analyzes the movement, dress, and cosmetic choices of topless dancers and neo-burlesque performers. Drawing on critical methods of analysis, she develops approaches for interpreting embodied erotic rhetoric and the marginal cultural practices that construct women's public erotic bodies. She follows these bodies out into the streets—into the protest spaces where sex workers and anti-rape activists challenge discourses about morality and victimhood and struggle to remake their own identities. Throughout, Werner showcases the voices of these performers and in the analyses shares her experiences as an audience member, interviewer, and paying customer. The result is a uniquely personal and erudite study that advances conversations about women's agency and erotic performance, moving beyond the binary that views the erotic body as either oppressed or empowered. Theoretically sophisticated and delightfully intimate, Stripped is an important contribution to the study of the rhetoric of the body and to rhetorical and performance studies more broadly.

Israel: Stripped Bare is a book about the brutal reality of Israel's existence, written from a perspective of an Arab-Jew. Some of these articles were already published in Sephardic Heritage Update, and some have been added over the years. It becomes crucial to see Israel's existence through the eyes of the Levantine prison, outside of the European perspective of the Jewish State. The book provokes serious ideas and thoughts concerning the future relationship between Arabs and Jews in the Middle East and the possible contribution of Jews born in Arab and Muslim countries to the future cultural symbiosis of this historical crossroads.

What kind of woman dances naked for money? Bernadette Barton takes us inside countless strip bars and clubs, from upscale to back road as well as those that specialize in lap dancing, table dancing, topless only, and peep shows, to reveal the startling lives of exotic dancers. Originally published in 2006, the product of years of first-hand research in strip clubs around the country, Stripped is a classic portrait of what it's like for those who choose to strip as a profession. Barton explores why women begin stripping, the initial excitement and financial rewards of the work, the dangers of the life—namely, drugs and prostitution—and, inevitably, the difficulties in staying in the business over time, especially for their relationships, sexuality and self-esteem. In this completely revised and updated edition, Barton returns to the strip clubs she originally studied to observe the major changes in the industry that have occurred over the last decade. She examines how \"raunch culture\" affects exotic dancers' treatment by their clientele, who are now accustomed to seeing nudity and sexualized performance in accessible, R and X -rated media from a variety of outlets, particularly the Internet. Barton explores how new media has transformed exotic dancing, allowing dancers to build an online brand, but also introducing possibilities for customers to take unauthorized nude photos and videos of the entertainers.. And finally, Barton speaks to new dancers as well as dancers she interviewed in the previous edition, examining how the toll of stripping still impacts the lives of exotic dancers in a changing industry. Incorporating new scholarship, new observations, and increased awareness of emerging media technology, Barton brings a fresh and important perspective on the challenges that women face working in the still-thriving world of exotic dancing.

This is a wonderful comic novel, about philosophy, the nature of art, the beauty of the ordinary, and about quirky, complete, night & day victims of obsessive-compulsive disorder. Two charming, over-anxious, germ-phobic friends, Isaac and Greg take a road trip from Boston to Philadelphia. They are both obsessed with Marcel Duchamp, his art and his ideas, and thus the destination has to be the largest collection of Duchamp in the world, The Philadelphia Art Museum, the actual place \"The Bride Stripped Bare by Her Bachelors, Even\" was to be delivered when it was cracked and broken in shipment. The piece is sometimes known as The Large Glass, and today it sits in the middle of a large gallery proudly displayed in its broken state which Duchamp repaired and then certified had been his intention all along. The two men are driven in a rented disinfected Winnebago by Kelly, a beautiful art scholar who smells like a mixture of lemons and fresh sawdust. They intend to pick up an ancient chocolate grinder, an exact working sculptural copy of one used in a Duchamp painting. Isaac intends to grind his own pure chocolate, which will prevent the build-up or arterial plaque, because his mother died of a stroke. Every action has its own suitable reaction, and then some. Isaac hopes eventually to overcome his devotion to his many obsessions and to re-enter the world, evidently his version of the real world. He is not an unreliable narrator, he is a hyper-reliable narrator, consumed by his own attention and thrilled with the connections he sees everywhere all at once. Of course when he finally gets to the museum he must dress-up as a woman to visit the collection.

Robert Lebel, French art critic and collector, was instrumental in rendering Marcel Duchamp's often hermetic life, art, and ideas accessible to a wider public across Europe and the United States, principally with his 1959 publication *Sur Marcel Duchamp*, the first monograph and catalogue raisonné devoted to the artist. Duchamp was a willing partner in the book's creation. In fact, his active participation in both its conception and layout was so substantial that the book is considered part of the artist's oeuvre. But the project took six years to complete. The trials, tribulations, quarrels, and machinations that plagued the production, publication, and publicity of *Sur Marcel Duchamp* are the focus of this correspondence between two lifelong friends. Translated and printed in full together for the first time, and including the original French texts, these letters, postcards, and telegrams from the collection of the Getty Research Institute offer uncensored access to the evolution of the relationship between Lebel and Duchamp from December 1946 to April 1967. They provide valuable information about their daily activities as well as those of friends and colleagues, vital details concerning their various collective projects, and illuminating insights into their thinking about art and life. These documents, witty and sincere, bear witness to the art of friendship and a friendship in art.

Materials selection and microstructural design of the sensing part of flexible pressure sensors are of great significance in improving their performance. However, achieving synergy between the sensing material and the microstructure of the flexible sensors remains a challenge. Herein, compressible and stretchable sensors based on a carbon nanofiber/poly(styrene-butadiene-styrene) (CNF/SBS) compound are demonstrated with a template-stripped method for detecting various human motions, including pulses, finger bending and pressure distributions. Benefiting from the adjustable fingerprint microstructure and mass fraction of CNFs, the as-designed flexible pressure sensor dramatically achieves a high sensitivity of 769.2 kPa⁻¹, a low detection

limit of 5 Pa and high reliability of over 1000 cycles. Moreover, the flexible sensor based on CNF/SBS can be stretched due to the outstanding tensile properties of SBS. The enhanced stretchable sensor remarkably possesses a high gauge factor of 105.6 with a stretch range of 0%-300% and up to 600% elongation. Importantly, the proposed pressure and tension strain sensors are investigated to monitor vigorous human motion, revealing their tremendous potential for applications in flexible compressible and stretchable wearable electronics.
